

# Boundary Review Committee

## Meeting Minutes

Wednesday 2.1.2017  
6:00-8:00

### Welcome, Agenda and Approve Meeting Minutes

FLO Analytics (FLO) welcomed the group and went over the evenings agenda. Copies of the meeting minutes from 1.25.2017 were distributed for review. A motion was made by Stephanie Tottingham to approve the minutes. The motion was seconded by Shyla Nelson.

### Springboard Proposal and Summary Statistic Review

FLO worked with the District to develop a springboard proposal illustrating revised boundaries that include the addition of Columbia River Gorge Elementary. The springboard proposal boundaries will be used as the starting point for the review committee to begin working from.

Summary statistics for the springboard proposal were provided to the committee with a glossary of terminology. FLO demonstrated how the summary statistics detail each school's capacity, the target capacity that the District has established and what the student body make up is within the existing boundaries compared to the springboard proposal. FLO also outlined how the numbers in the summary tables represent the number of students living within a school boundary as opposed to students attending a given school. This is necessary, as ideally the boundary that a student lives within will determine which school they are assigned to.

The summary statistics include information on: facility capacity, target facility capacities, the number of students within each attendance area boundary, the percent of the target capacity those students make up, and the magnitude over/under the target capacity the school is. Summary information is also provided on each individual school providing a class breakdown and demographic information.

A question and answer session followed.

FLO then provided the committee with maps showing the springboard proposal boundaries. Background considerations on how the springboard proposal was developed were presented and included; neighborhood units, road configuration, bridge locations, topography, capacities and demographics. These considerations are outlined in the core values and guiding principles as well as District policies.

A question and answer session followed.

The committee took a brief break in which the tables were rearranged for the committee to assemble into workgroups.

# Boundary Review Committee

## Meeting Minutes

Wednesday 2.1.2017  
6:00-8:00

### Committee Workgroups

The committee assembled into three workgroups. The groups included Gause and Hathaway, Columbia River Gorge and Cape Horn-Skye, and Canyon Creek and Jemtegaard Middle Schools.

Large format springboard proposal maps with detailed streets and information on the number of students within various areas were provided to committee workgroups. FLO requested the committee to spend 15 minutes reviewing the springboard proposal, the summary statistic information and then to report back to the group on their likes, dislikes and pros and cons of the proposal.

Group discussion followed with each workgroup listing areas of the boundaries they like and areas they will focus on refining.

The remainder of the meeting the workgroups discussed ideas for refinements to the springboard proposal boundaries. Questions included transportation considerations to the District staff and on impacts to student composition to FLO. The two elementary groups merged into one group for a larger group discussion. Several ideas on changes to elementary school boundaries are in the process of being vetted. FLO will provide detailed summary statistic information and a map to the elementary workgroup at the next meeting to illustrate the impacts of their suggestions. If the elementary group agrees on the draft scenario, a formal proposal can be made to the full committee. If approved the springboard proposal will be modified with the changes.

The middle school workgroup will continue to explore ideas for updates to the springboard proposal.

### Formal Proposals and Vote

No formal proposals were made to change the springboard proposal and the committee will continue work to refine boundaries at the next meeting. The committee will reconvene on Monday February 6<sup>th</sup> to make up for the first committee meeting being cancelled due to weather.
