

Using school iPads on home WiFi

Tap Settings → Wifi → choose your home wifi from the list on the right and enter the password

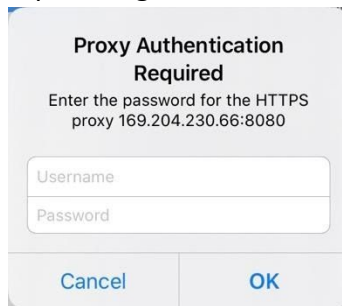

Tap on the Safari app from the home screen

This message will pop-up

Tap Settings and this message will pop-up

Enter username and password

Username: `firstname_lastname`

Password: Same password as student email

Troubleshooting steps if proxy authentication window pops up after entering username and password:

- Close all tabs in Safari and Google Chrome and try entering username and password again
- Restart iPad → open Safari again and enter proxy info when window pops up
- Perform a hard restart by holding the power button and the home button at the same time for 15-20 seconds until the Apple logo appears → Open Safari again and enter proxy info when window pops up
- Try connecting to a different wireless network, possibly a hot spot on a phone → open Safari again and enter proxy info when window pops up
- Email TechHelp@washougalsd.org
 - Please include a few words in the subject to describe the problem
 - Please include your name the school you attend in the body of the email
 - Also include as much detail about the problem as possible
 - You will receive an email back giving suggestions to solve the problem or questions to gather more information so the problem can be resolved
